One feature of the thousands of testimonials that have been given in behalf of S. S. Is remarkable. In numbers of instances it is related that a great deal of time and money have been spent in a vain effort to secure relief from disease in the usual way. A knowledge of the virtues of Swift's Specific would have saved the time and the money, to say nothing of the prevention of the suffice of the saved the time and the money, to say nothing of the prevention of the suffice ing. There need be no such mistakes made now. The great blood purifier is for asio by druggists everywhere, and the S. S.
